

Innovations that move us – together with you

At CP Tech, we develop and manufacture high-performance components and complete solutions – from motorsport and performance vehicles to aerospace. One of our best-known projects is the “Halo” cockpit protection system in Formula 1.

What drives us? Our passion for lightweight construction, precision and innovation. Our products – including suspension components, structural parts and active aerodynamic elements – withstand extreme loads and meet the highest safety requirements.

With our headquarters in Büren, we are located right next to Paderborn-Lippstadt Airport. As an international company with an additional site in Shanghai, we stay close to our customers worldwide. As a reliable development partner and systems supplier, we support leading OEMs, aviation companies and racing teams in bringing their visions to life – with components that meet the highest requirements. We always act according to our values: efficiency, transparency and responsibility.

SetupWizzard – our brand for wheel alignment

SetupWizzard is a CP Tech brand that brings together our motorsport expertise in a mobile wheel alignment system designed for the highest standards of precision and efficiency. Digital sensors, our proprietary WizzardOS software and a carefully designed range of accessories make SetupWizzard the first choice for motorsport teams and professional workshops, supported by a worldwide partner network.

Working Student – SetupWizzard (all genders)

There is currently no specific vacancy, but would you like to do more than maintain data and actively contribute to the development of innovative products? Then impress us with your unsolicited application. Employed by CP Tech, you will work directly with the SetupWizzard product team and support us in building and optimizing our high-performance wheel alignment system for the racetrack.

Possible areas of responsibility:

- Sales & ERP Support: You support the SetupWizzard sales team in its day-to-day work and keep track of quotations, orders and sales orders in the ERP system.
- Innovation & Product Development: You contribute to the further development of SetupWizzard by creating, maintaining and improving bills of materials (BOMs).
- Production & Procurement: You transfer new components and products into production in a structured way and support the procurement of standard and purchased parts.

- Quality & Shipping: You support quality-related topics, assist with outgoing goods inspections and actively contribute to shipping processes.

Your profile:

- A degree programme in business or engineering
- You work in a structured and reliable way and are keen to take on responsibility
- Basic knowledge of ERP systems and MS Office is an advantage
- A passion for motorsport and technology is a plus

What we offer:

- In-house health management, including supplementary health insurance
- Hybrid working models (depending on the area of work)
- Structured onboarding, including an onboarding buddy
- Individual training opportunities and talent development programmes
- Employee discounts through Corporate Benefits
- High-quality team apparel
- Modern machinery
- EV charging stations
- In-house language courses
- Employee events

Apply to us!

Please send your application documents online to bewerbung@cp-tech.com, stating your earliest possible start date and salary expectations.

Yvonne Ortmann

Team Lead HR Administration & Controlling

We look forward to receiving your application!
